

## TASK ORDER NUMBER 50

This Task Order No. 50 is an amendment to and made a part of the Agreement dated October 15, 2017, between Gainesville-Alachua County Regional Airport Authority (**OWNER**) and AECOM Technical Services, Inc., (**AECOM**). Task Order No. 50 includes this scope of services and the attached cost proposal (Exhibits A, B and C). The Scope of Services for this Task Order No. 50 is as follows:

### A. SCOPE OF SERVICES

#### I. Project Description

The **OWNER** hereby retains **AECOM** to furnish Post Design services for:

- Gainesville Regional Airport, **Baggage Handling System Expansion – Phase 2**

The above-described improvements are hereinafter called the **PROJECT**.

The **PROJECT** scope includes Phase 2 construction of an outbound baggage handling system (BHS) including related site/civil work, asphalt paving, a new dumpster enclosure, and temporary construction measures. The BHS work includes belt and motor assemblies, controls/system monitoring systems, extension of the catwalk system, and related BHS system elements. The existing American bag belt is not being extended. A new carousel for American is being constructed and will tie into the new outbound conveyor system. A new structural steel canopy will be constructed to cover and protect the exterior portions of the BHS system from inclement weather. A new bag makeup carousel is also included.

#### II. Services by Architect/Engineer

The services that **AECOM** shall furnish to the **OWNER** under this Agreement shall include those defined below.

##### A. Post Design Services

1. Refer to Exhibits A, B and C, which contain a detailed list of construction administration and periodic inspection tasks to be performed during the Post Design Services. All services will be provided on a time and materials basis and invoicing will include detailed accounting of expenditures, an activity log, and progress report presented with each invoice.
2. Coordinate, arrange for, attend, and document the Pre-Construction Conference.
3. Provide general consultation and advice to the **OWNER** with respect to the Construction of the **PROJECT**.

4. Perform periodic inspections of the **PROJECT** by the Architect and various Designers/Engineers of Record while construction is in progress to observe the progress, workmanship, and quality of materials for conformity with the plans and specifications and provide appropriate reports to the **OWNER**. These inspections will be coordinated and scheduled with Airport staff and the Contractor at critical points in construction for each design discipline. Generally, that will entail inspections prior to work being covered by other work.
5. Receive, log, and review for compliance all detailed construction shop and erection drawings and material samples submitted by the Contractor for compliance with the design concept of the **PROJECT** and for compliance with the information given in the design and construction contract documents. Submittals will generally be categorized as approved, approved as noted, revise and resubmit, etc. **AECOM** will endeavor to return all submittals to the Contractor within a two-week time frame.
6. Review and develop/process routine change orders or routine supplemental agreements as may become necessary during construction of the work, it being understood that change orders or supplemental agreements involving major changes or revisions to plans, specifications, or construction operations will be performed in accordance with "Additional Services," described herein.
7. Perform substantial completion inspections (at each major phase of work) and a final inspection with representatives of the **OWNER**, Contractor, and appropriate governmental agencies of the completed **PROJECT**.
8. Provide record drawings based on the observations of Airport staff and the Contractor's marked up as-built drawings.
9. Provide **OWNER** with an Architect/Engineer's Certification of Completion based on our inspections and certifications from Airport staff who performed daily inspections of the work.

B. Additional Services

If authorized in writing by the **OWNER**, **AECOM** will furnish or obtain from specialty consultants the following services in connection with the **PROJECT**.

1. Perform daily RPR inspections and daily coordination of the construction with airport tenants, agencies, and the public.
2. Prepare additional permit applications with supporting drawings, figures, and attachments as required. (Obtaining the SJRWMD and facilitating the City site and building permit process is part of the design task.)
3. Make major revisions to completed or partially completed design plans and specifications to incorporate changes made to the scope of work after approval of said

element of the **PROJECT** by reviewing agencies provided that these revisions are not attributable to any errors or omissions of **AECOM**.

4. Prepare to serve as a consultant, witness, or representative for the **OWNER** in any public hearing, public information meeting, or other administrative proceeding involving the **PROJECT**. Such consultation and representation in connection with litigation or other legal proceedings involving the **PROJECT** shall be covered under subsequent supplemental agreement.
5. Assist the **OWNER** in performing any inspection of facilities constructed under this Agreement after final acceptance of the work but prior to the expiration of any Contractor's warranty periods imposed in construction contract documents.
6. Furnish printed copies of final plans, specifications, and contract documents.
7. Perform services involving the preparation of rate schedules, earnings and expense statements, feasibility studies, appraisals, evaluations or other similar detailed analysis that are not normally required in the scope of the **PROJECT**.
8. Prepare drawings from field measurements or existing construction when required for planning additions or alterations thereto where they are not included in the original scope of the **PROJECT**.
9. Perform additional engineering surveys as may be necessary for the proper design and construction of the **PROJECT**.
10. Prepare and/or verify "as-built" information provided by the construction Contractor(s) by means of a survey crew.

### **III. OWNER'S RESPONSIBILITIES**

The **OWNER's** responsibilities shall include the following:

1. Coordinate the **OWNER's** requirements for the **PROJECT** with the Contractor and **AECOM**.
2. Provide daily site visit and coordinate the Contractor's work with airport tenants and the public. **AECOM** is not providing daily RPR inspection/CEI services and we understand that the **OWNER** is not hiring that service from another firm.
3. Provide copies of pertinent documents, reports, plans, specifications, photography, standard forms, and other similar data available to the **OWNER** that are required by **AECOM** for the proper performances of his services.

4. Provide information and make decisions as may be required to prosecute the work in a timely manner.
5. Review insurance documents submitted by Contractor(s) for conformance with the construction contract documents.
6. Provide payment of permit application fees directly to the agency as necessary to complete submittal requirements to respective agencies.

**B. PAYMENT**

Total maximum Not-to-Exceed contract amount of **\$253,148** based on the attached Exhibits A, B and C. Invoices will be presented monthly and will be supported by a detailed accounting of expenditures, an activity log, and a progress report.

**C. EFFECTIVE DATE**

This Task Order No. 50 shall be effective as of August 28, 2025.

**D. ORIGINAL AGREEMENT**

All Terms and Conditions of the Agreement dated October 15, 2017, as amended, shall remain the same and shall apply hereto.

**E. ACCEPTANCE**

By signature, the parties hereto accept the provisions of this Task Order No. 50.

GAINESVILLE REGIONAL AIRPORT  
BAGGAGE HANDLING SYSTEM PHASE 2  
CONSTRUCTION PHASE SERVICES PROPOSAL

### **GENERAL**

The project includes construction of the Phase 2 Baggage Handling System (BHS) with new exterior carousel under canopy and expanding the conveyor system to the American Airlines counters, fire suppression system, mechanical ventilation, power distribution for the BHS, refeed power to one airfield security gate, relocate existing and provide new pole mounted lighting fixtures, and utility modifications as coordinated with GRU.

### **PROJECT SCOPE**

This proposal provides for the Construction Phase Services, during the construction of the project to verify fulfillment of contract requirements, and closeout documentation. The overall scope of work for the Construction Administration Services is indicated below:

1. Prepare Issued For Construction Drawing;
2. Review and advise Airport on Contractor's schedule;
3. Attend the Pre-Construction Conference and act as the Airport's Consultant at the Conference;
4. Catalog, review and approve shop drawings, samples, and other submissions as to conformance with design concept, permitting conditions, and construction documents. Incorporate Airport comments with respect to the same; Shop drawings will include all aspects of the project from the expansion of the outbound BHS System, HVAC fans, dry pipe fire protection coverage for the new exterior BHS carousel, site electrical work and exterior lighting, site utility modifications, electrical power distribution, and grounding.
5. Provide an on-site project observation visit periodically to review progress, quality, and quantities of the executed work and to determine, in general, if the work is proceeding in accordance with the Contract Documents. The Consultant will not be responsible for the means, methods, techniques, sequences, or procedures of the construction selected by the Contractor(s) or the safety precautions and programs incidental to the work of the Contractor(s). The Consultant's efforts will be directed toward determining whether the completed project will generally conform to the Contract Documents. During such visits and based on on-site observations, the Consultant shall keep the Airport informed of the progress of the work, shall endeavor to guard Airport against defects and deficiencies on the work of Contractor(s), and may disapprove or reject work as failing to conform to the Contract Documents;
6. Provide additional consultation and advice to Airport during all phases of the

## EXHIBIT B

- 
- construction;
7. Attend JCMs; It is anticipated the Engineer will call-in to meetings unless it coincides with a site visit;
  8. Respond to various Requests for Information (RFIs), Job Memoranda (JM), and other field prepared inquiries; Prepare and Issue Field directives;
  9. Review Change Orders (COs) as prepared by the contractor;
  10. Attend and document substantial and final completion inspections;
  11. Review Contractor Applications for Payment;
  12. Site observation by the Engineer to assist Airport staff. Field role is anticipated to be led by GNV staff.
  13. Prepare Record Documents and Revit/AutoCAD files based upon information supplied by the Construction Contractor; and
  14. Receive and review written guarantees and other documents assembled by the Contractor(s) for sufficiency.

### **COMPENSATION**

Reference the enclosed spreadsheets and summary tables for the AVCON Construction Phase fees.

**AVCON, INC.** will provide construction administration for the project, serve as intermediary with the GNV staff, as well as provide the Record Drawing documents for the completed project.
